

Test checklist

Please work through each section below on the live site and tick items off as you go. If anything doesn't behave as described, note it down and send it over.

LIVE saved for real in Supabase, or charged for real in Stripe (test mode) **DEMO** general site checks — nothing here is stored

Note: use Stripe's test card **4242 4242 4242 4242** (any future expiry, any CVC) for anything that takes a payment. Search results and the admin directory/applications lists deliberately show a fixed set of permanent demo entries mixed in alongside real ones, so those screens never look empty — that's intentional, not a sign something's missing. The only things that fully reset are the general site chrome (nav/footer/404) and the mobile-layout check at the bottom of this list.
